## **Quick tips on what to do with your medications**

- Keep your prescription drugs in a locked or secure place.
- Monitor your medicine cabinet and keep track of how many pills are in each of your prescription bottles.
- If your children take prescription drugs, keep control of the bottles. Talk to your school nurse about monitoring and giving your teen their medication during the school day.
- Educate your children about the dangers of abusing prescription drugs and tell them that sharing prescription drugs is illegal.
- Be alert – monitor internet use in your home. There are many sites on the internet where prescription drugs can be purchased without a prescription.
